

Scott Gangemi

Hey there,

I'm Scott. I'm a software engineer and I'm passionate about building cool applications, and fantastic experiences that people will love, and keep coming back to.

Experience

Expert360 Tech Lead

Feb 2019 - Now

- Lead my squad to launch an Elasticsearch matching product, and established strategy to port features out of our legacy system.

Jul 2018 - Feb 2019

Software Developer

- Building React components for our platform, and rebuilt a large part of our design system.
- Migrating legacy PHP code into Elixir.

APG & Co. Jan 2016 - Apr 2017 Junior Web Developer

- Automated large parts of our EDM build process.
- Rebuilt our six page checkout into a one page wonder.
- Rewrote our old CSS into SASS (cutting off 300kb in the process).
- Rewrote thousands of lines of JavaScript into React.

Domain

Apr 2017 - Jul 2018

Full Stack JavaScript Developer

- Built React components and Node servers, as well as optimised the performance of microservices.
- Rebuilt Domain's listings pages and transitioned them away from a legacy monolith code base.

Volunteering

NodeGirls

I've mentored and taught at NodeGirls a number of times and have:

- Mentored individuals in an Express class.
- Helped to organise and run a React workshop.

Education

UTS

2012 - 2015

Bachelor of Integrated Product Design:
Major in Interaction Design

Skills

I'm really comfortable with:

- Building awesome React apps
- The web classics (JS, HTML, CSS)
- Elixir • GraphQL • NodeJS

I'm currently learning:

- Databases • Networking
- Computer Science fundamentals
- Architecture • Leadership
